

**Live.
Manage.
Thrive!**

Envision Your Florida.

With its natural wonders and economic diversity, Florida delivers the promise of the *Sunshine State*. And for more than 20 years, Sustainable Florida has promoted the adoption of economic and environmental practices to ensure a better state for us all.

The alliance of corporations, government groups, nonprofit organizations, universities and environmental groups works hard to show the way.

No longer a marketing gimmick for a few, the concept of sustainability is today a strategic priority for businesses and governments alike. For corporations, sustainability offers unique opportunities to gain competitive advantages, inspire innovation and drive bottom-line results.

Governments, too, are focused on sustainability and continue to adopt policies that encourage investment in projects that decrease energy use, reduce waste and improve the quality of life.

Do Well by Doing Good.

Sustainable Florida annually recognizes the best practices of organizations of all types. A sampling of award-winning efforts points the way to continued sustainability in green building, energy conservation, water reuse, innovative agricultural methods, waste reduction, cleaner manufacturing and more.

Become Part of the Team

As an active member of ***Sustainable Florida***, you have access to a statewide network of sustainability professionals. Regional networking and educational events held throughout the year provide the opportunity to enhance your sustainability operations. Connect to the Green Schools movement with K-12 partners and take advantage of the Educational Alliance on college and university campuses. Policy advocacy will strengthen the marketplace.

Let's work together to create the Florida we want: a ***Sustainable Florida***. Join us today!
